Fröling Energy Tank Specifications

Capacity: 450 liters (119 gallons)

Diameter: 22"(without insulation, the included, but removable insulation is about 3" thick)

Height: 73"(without insulation)

Hot Water Coil: Spiral coil of corrugated stainless tubing (heating surface about 65 square feet) 1 ¼" external thread.

Output at 4 gallons per minute with flow temperature 113°F:

Total Output at Tank temperature 122°F:	60 gallons
Total Output at Tank temperature 158°F:	122 gallons
Total Output at Tank temperature 194°F:	205 gallons

Five 1 ½" tapings, internal thread

Two ¾" tapings, internal thread

Tank maximum operating pressure 3 bar, maximum temperature, 230°F

Coil maximum operating pressure 6 bar, maximum temperature, 230°F
