AUTOMIX 10 is an advanced, compact outdoor reset control for hydronic radiator and radiant floor heating applications. AUTOMIX 10 works continuously and proportionally. Through impulses from the sensors the control resets the supply water temperature as the outdoor temperature changes.

AUTOMIX 10 includes a min. and max. limiter for the supply water temperature and a freeze protection feature. AUTOMIX 10 is delivered factory wired which minimizes installation problems in the field. The main supply and all sensors have plug-in connections. The quick and easy do-it-yourself installation saves on labor charges.
